

### AMENDMENTS TO THE CLAIMS

Please amend claims 1 and 22 as indicated below.

#### Listing of Claims

1. (Currently Amended) A medical tool comprising  
  
a central body having an in vivo inserted end and a non inserted end,  
  
wherein at least one functional unit for performing an in vivo procedure, and at least one imaging unit are integrated in said central body at said in vivo inserted end,  
  
wherein said imaging unit comprises a single optical window dome, an image sensor, a lens and an illumination source, and  
  
wherein the image sensor, the lens and the illumination source are situated behind and operate through the single optical window dome.
2. (Previously Presented) The tool according to claim 1 wherein the non inserted end includes a controller, said controller functionally coupled to the functional unit.
3. (Original) The tool according to claim 1, said tool including silicon, plastic or metal.
4. (Previously Presented) The tool according to claim 1 wherein the functional unit comprises one or more elements selected from the group consisting of: graspers, blades, clamps, tissue collecting baskets, means for delivering treatment, stents, forceps, snares, hemostasis devices, dilatation balloons, catheters, sphincterotomes, guidwires, ~~and~~ suturing devices and any combination thereof.
- 5-6. (Canceled)
7. (Original) The tool according to claim 6 wherein the illumination source is an LED.
8. (Original) The tool according to claim 1 comprising a transmitter.
9. (Original) The tool according to claim 8 wherein the transmitter is a wireless transmitter.
10. (Original) The tool according to claim 8 wherein the transmitter is an RF transmitter.

APPLICANT(S): GILREATH, Mark G. et al.

FILED: July 11, 2003  
Page 5

11. (Previously Amended) The tool according to claim 1 comprising a channel, wherein said channel passes through at least the central body.

12-17. (Canceled)

18. (Previously Presented) A system for performing in vivo procedures, said system comprising:

- a tool according to claim 8; and
- a receiver comprising a recording mechanism.

19. (Original) The system according to claim 18 comprising a monitor in communication with the receiver for displaying in vivo-information.

20. (Original) The system according to claim 18 comprising a processor for processing in vivo information.

21. (Previously Presented) The tool according to claim 1, wherein at least said functional unit and said imaging unit are for single use.

22. (Currently Amended) The tool according to claim 1, wherein said imaging unit comprises an optical system positioned behind the single optical ~~window~~ dome.

23. (Previously Presented) The tool according to claim 1, wherein said tool comprises a battery.

24. (Canceled)
